

Thanks so much for your purchase! Your support is greatly appreciated since I am an independent artist. :)

Your Purchase

Please note that with this purchase includes the license to use these asset(s) within:

- Unlimited commercial media products
- Unlimited non-commercial media products
- Within any promotional materials for the products above

At this time of purchase, the following media products you may NOT use these asset(s) in are as follows:

- Products and applications related to Web3, NFTS, blockchain, or crypto.
- For use in AI or AI training
- You may not resell or redistribute the assets, or upload them to another platform on their own. They must be used as part of a larger media product.

Please make sure you read the full license agreement attached to this pack and keep it for your records before using any of these assets.

Tileset Usage

The tileset included has tiles of 24x24 pixels. There is also an upscaled version included for 48x48 pixels, however please note that the resolution is still at 24x24 and all other assets used should be similarly scaled x2 if used with the 48x48 version, to help prevent mixels.

This tileset also includes a file for use with Tiled map editor (which you can download here <https://www.mapeditor.org/>), however you may use the tileset in any map editor or engine and does not need to be used in Tiled. For any decor tiles, (flowers, rocks, plants, books, etc) it is recommended that you use free placement tool instead of snapping to the grid for more realistic placement of the items and clutter. Not all of these items are adjusted to fit on every surface, table or shelf, so that is why I recommend using free placement tool for these types of items if your program has that feature, though it may not always be required. If the program or engine you are using does not have free placement tool, please feel free to edit the tileset and position of objects so that it fits your needs.
